

ANGAPPAN SABARIMANI R

Healthcare Business Analyst | US Healthcare | RCM | Healthcare Analytics

Chennai, India | angusabari@gmail.com | 8838361660

PROFESSIONAL SUMMARY

Healthcare Business Analyst with 9 years of experience across US healthcare and Revenue Cycle Management domain experience across claims, insurance AR, denial management, medical coding, payment/ERA, payer workflows and healthcare operations. Hands-on business analysis experience in requirements elicitation, BRD/FRD, process mapping, user stories, acceptance criteria, RTM, UAT, workflow analysis and root cause analysis. Experienced in translating RCM processes into analytics, interoperability and digital-transformation requirements using SQL, Power BI, Advanced Excel, HL7/FHIR foundations and X12 837/835 concepts. Built independent portfolio projects demonstrating end-to-end RCM product thinking, data-driven workflows, interoperability, analytics, automation opportunities and human-in-the-loop AI decision support.

CORE SKILLS

Business Analysis: Requirements Gathering & Elicitation • BRD • FRD • User Stories • Acceptance Criteria • RTM • Gap Analysis • RCA • AS-IS / TO-BE • Process Mapping • Workflow Analysis • UAT • Stakeholder Collaboration

US Healthcare / RCM: US Healthcare • Revenue Cycle Management • Insurance AR • Claims Lifecycle • Denial Management • AR Aging • Payment/ERA • EOB • Medicare • Medicaid • Commercial Insurance • Prior Authorization • Medical Coding • HIPAA/PHI

Healthcare Technology: X12 837/835 • HL7/FHIR Foundations • Healthcare Data Mapping • Integration Requirements • API Concepts • EHR/EMR Concepts

Analytics & Delivery: SQL • Power BI • Advanced Excel • KPI Reporting • Data Analysis • Jira • Visio • Agile/Scrum Fundamentals • Process Improvement • Workflow Optimization

Application Engineering: React • TypeScript • Vite • Layered Architecture • Data Validation • Business Logic • Reusable UI Components • Testing / Regression Validation

SELECTED HEALTHCARE BUSINESS ANALYSIS PROJECTS

RyVora — US Healthcare RCM Digital Transformation & Interoperability Platform

Role: Healthcare Business Analyst / Product & Solution Design — Independent Portfolio Project | Nov 2025 – Sep 2026

Technology: React 19 • TypeScript • Vite • SQL concepts • Power BI requirements • HL7/FHIR interoperability concepts • X12 837/835 • Jira • Visio

- Designed and built a simulated end-to-end RCM platform spanning Claims, Denials, Payments, AR Management, Exceptions, Interoperability, Analytics, Automation and AI/HITL decision support.
- Translated RCM business needs into Project Charter, BRD/FRD, stakeholder requirements, user stories, business rules, acceptance criteria, RTM, AS-IS/TO-BE process maps, workflow analysis, solution/integration architecture and UAT requirements.
- Designed a layered application flow from validated synthetic source data through typed data structures, services and business logic into reusable React UI, keeping domain calculations outside presentation components.
- Connected the claim lifecycle across 837 submission context, denials, AI recommendations, human review, payment/835 remittance, AR, exceptions and cross-module analytics for integrated operational traceability.
- Defined and implemented operational work queues, KPI views, search/filter/sort/pagination, claim-level drill-downs, exception analysis, interoperability transaction visibility and AR aging/follow-up workflows.
- Defined interoperability requirements around X12 837/835 transactions and HL7/FHIR concepts, including data mapping, validation, transaction status and downstream workflow relationships.
- Defined AI-assisted denial recommendation and Human-in-the-Loop workflows with an explicit governance boundary: AI recommendation is separated from the human decision; unsupported model metrics are not fabricated.
- Defined automation opportunities for exception handling, work-queue prioritization and repetitive RCM activities while keeping the portfolio implementation read-only and avoiding claims of live payer or background workflow execution.
- Performed integrated data validation, regression testing, KPI/relationship validation, browser verification, lint/type/build checks and production-readiness review against an approved synthetic/non-PHI dataset.

Healthcare Claims Analytics & Denial Management

Role: Healthcare Business Analyst — Independent Portfolio Project | Jan 2026 – Apr 2026

Tools: SQL • Power BI • Excel • Jira • Visio

- Designed an end-to-end simulated healthcare claims analytics solution using a 1,000+ claim dataset to improve denial visibility and RCM performance analysis.
- Gathered and documented business requirements; analyzed the claims lifecycle and created AS-IS/TO-BE process flows to identify workflow gaps and improvement opportunities.
- Prepared BRD and FRD, developed user stories, business rules and acceptance criteria, and created an RTM linking requirements to solution components.
- Developed SQL analysis for denial trends, payer performance, AR aging and payment variances and designed Power BI dashboards for operational KPI monitoring and decision support.

PROFESSIONAL EXPERIENCE

Senior Analyst — R1 RCM | Chennai | Dec 2025 – Present

- Analysed recurring medical coding denials and rejections across ~100 charts/month, identifying 8–12 recurring coding issues across a 50+ coder population through CPT and diagnosis-code combination analysis.
- Performed root-cause analysis of recurring invalid CPT and diagnosis-code tagging and validated findings against applicable CMS and ICD coding guidance to identify coding and oversight gaps.
- Collaborated with coding leads, supervisors, client managers and Internal QA to address recurring coding patterns, strengthen diagnosis validation and CPT billing review, contributing to gradual reduction in coding-related denials and improved first-pass clean-claim performance.
- Used Epic-assisted warning and validation triggers to revalidate coding patterns and strengthen pre-submission error detection.
- Worked with the R37 AI-enabled healthcare quality application to support audit-ready chart selection using coding rules, ICD patterns and configured audit triggers; monitored auditor findings, coder validation and recurring coding patterns affecting coder KPIs.
- Supported continuous quality improvement by analysing audit findings and feeding recurring coding-rule issues back into the coder validation workflow.

Senior Specialist – Insurance AR — Business Integrity Services | Chennai | Mar 2022 – Sep 2025

- Managed a portfolio of 500+ medical claims across Medicare, Medicaid and Commercial payers, supporting timely follow-up and reimbursement optimization.
- Analyzed denial trends and performed root cause analysis to identify recurring claim issues and implement corrective actions, reducing 10+ denial cases per month.
- Increased and sustained provider payment ratio by 17% over four consecutive quarters through denial analysis, payer collaboration and reimbursement optimization.
- Analyzed the end-to-end claims lifecycle, reimbursement issues, process gaps, workflow inefficiencies and operational improvement opportunities.
- Evaluated AR aging reports and prioritized high-value accounts; collaborated with AR, Medical Coding, Quality Assurance and cross-functional teams to resolve claim issues and streamline workflows.

Senior Analyst — HCLTech | Chennai | Feb 2022 – Mar 2022

- Performed quality audits on US medical claims, validated processing accuracy, identified recurring defects and documented quality findings.
- Analyzed quality trends and collaborated with Operations teams on corrective actions, process compliance, SLA adherence and first-pass processing accuracy.

Senior Executive – Accounts Receivable — Omega Healthcare | Jan 2021 – Jan 2022

- Managed end-to-end Insurance AR follow-up for Medicare, Medicaid and Commercial claims, supporting reimbursement, AR reduction and RCM objectives.
- Analyzed denials, underpayments, rejections, EOBs, ERAs, claim history, contractual adjustments and payer policies to determine resolution strategies.
- Resolved reimbursement issues through payer communication, appeals, corrected claims, reconsiderations, payment variance analysis and claim-status follow-up.
- Collaborated with Medical Coding, Billing, provider offices and cross-functional teams to resolve documentation, coding, billing and claims-adjudication issues.

- Maintained claim documentation in accordance with HIPAA, CMS regulations, Medicare/Medicaid guidelines, payer policies and quality standards.

Executive – Accounts Receivable — eCare India Pvt. Ltd. | Aug 2019 – Dec 2020

- Supported end-to-end claims management for Medicare, Medicaid and Commercial payers through insurance follow-up and reimbursement tracking.
- Conducted eligibility and benefits validation, claim status monitoring, denial/rejection investigation, EOB analysis and payment variance review.
- Worked with insurance payers to resolve claim discrepancies, submit corrections and improve reimbursement turnaround while maintaining compliant documentation.

Digital Game Design Faculty — Imageminds | Apr 2017 – May 2019

- Delivered lectures and hands-on training in digital game design, programming, project supervision, technical guidance, performance evaluation and curriculum development.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Certified Professional Coder (CPC) – AAPC

Business Analysis Fundamentals — Requirements Gathering, BRD/FRD, User Stories, Acceptance Criteria, Process Mapping, RTM

SQL for Data Analysis • Microsoft Power BI • HL7/FHIR Foundations • Agile Fundamentals

EDUCATION

Bachelor of Technology (B.Tech.) – Information Technology | Adhiparasakthi Engineering College | Affiliated to Anna University
